

Setting Up GitHub

Create Repository

Name the Repository

The screenshot shows the GitHub 'Create a new repository' page in a web browser. The browser's address bar shows 'https://github.com/new'. The page has a dark header with the GitHub logo, a search bar, and links for 'Pull requests', 'Issues', 'Marketplace', and 'Gist'. The main content area is titled 'Create a new repository' and includes a subtext: 'A repository contains all the files for your project, including the revision history.' Below this, there are two input fields: 'Owner' (with a dropdown menu showing 'brosius01') and 'Repository name' (an empty text box). A hint text says: 'Great repository names are short and memorable. Need inspiration? How about scaling-computing-machine.' There is a 'Description (optional)' text area. Below the description, there are two radio button options: 'Public' (selected) and 'Private'. The 'Public' option has a subtext: 'Anyone can see this repository. You choose who can commit.' The 'Private' option has a subtext: 'You choose who can see and commit to this repository.' There is a checkbox labeled 'Initialize this repository with a README' and a subtext: 'This will let you immediately clone the repository to your computer. Skip this step if you're importing an existing repository.' Below the checkbox, there are two dropdown menus: 'Add .gitignore: None' and 'Add a license: None'. At the bottom of the form is a green 'Create repository' button. The footer of the page shows '© 2017 GitHub Inc.' and links for 'Terms', 'Privacy', 'Security', 'Status', and 'Help'. The system tray at the bottom shows the date and time: '2:09 PM 6/1/2017'.
